## Section 2 Weather Patterns Answers

**section 1: what is weather? section 2: weather patterns ...** - weather patterns weather patterns 2 • clouds form when air is lifted and cools. • areas of low pressure usually have cloudy weather. • sinking motion in high-pressure air masses makes it difficult for air to rise and clouds to form. • that's why high pressure usually means good weather. **chapter 2 weather - hanover area school district** - weather - is the state of the atmosphere at ... weather patterns section 2 because air and moisture move in the atmosphere, weather is constantly changing - air mass - a large body of air with properties like ... chapter 2 weather.ppt author: david borofski **name class date - where to look when you are under the weather** - name class date section 12.2 weather systems, continued in your textbook, read about fronts and wave cyclones. complete the table by filling in the type of weather system described. use the following terms: front, cold front, occluded front, stationary front, warm front, wave cyclone. in your textbook, read about pressure systems. **2. non routine products and services - weather** - 2 2. non-routine products and services one of the primary duties of the nws forecast office is to highlight the potential for hazardous or dangerous weather conditions in the form of watches, warnings and advisories. this threat for hazardous or dangerous weather then needs to be communicated to the **section 2 fronts and weather - midway middle school science** - section 2 fronts and weather key concept weather results from the movement of air masses that differ in temperature and humidity. what you will learn • differences in pressure, temperature, air movement, and humidity cause changes in weather, including severe weather. • severe weather and floods can cause property damage and death. **section 2 currents and climate - midway middle school science** - section 2 currents and climate key concept ocean currents transport energy, affect climate and weather, and distribute nutrients. what you will learn • surface currents affect climate by distributing energy around earth. • changes in surface currents, such as el niño, can cause changes in weather patterns. why it matters **section 2 air masses and fronts - southwest middle school** - section 2 air masses and fronts 1. by water content and temperature of the air 2. dry, warm 3. northern canada 4. warm air masses form over warm water or land, and the north atlantic and pacific are cold. 5. air mass how it affects weather cp from northern canada very cold winter weather and mp from the north pacific ocean rain and snow in ... **chapter 2. weather and climate - nasa** - chapter 2. weather and climate the structure of the atmosphere surrounding the earth is a gaseous envelope or atmosphere, held in place by the planet's gravitational attraction. the earth's atmosphere is a complex dynamical, physical, and chemical system. dynamic processes cover a large range of scales from the microscopic-scale **14 section 2 currents and climate** - section 2 name class date currents and climate continued how do el niño and la niña affect climate? every 2 to 12 years, the south pacific trade winds move less warm water to the western pacific than usual. as a result, surface-water temperatures along the west coast of south america rise. over time, this warming spreads westward. **name class date weather and climate chapter 2 test** - name class date. weather and climate chapter 2 test (40 points total) multiple choice (1 point each) identify the letter of the choice that best completes the statement or answers the question. \_\_\_ 1. lightning is an electric discharge between a positively charged area and... a. a rising air mass.
