
Section Measuring Motion Answer Key

skills worksheet directed reading a - westerville city schools - directed reading a section: measuring motion 1. answers will vary. sample answer: i cannot see earth moving. yet, i know it moves (revolves) around the sun. 2. a 3. d 4. reference point 5. they make useful reference points because they do not move. 6. answers will vary. sample answer: yes; a moving object can be used as a reference point ... **section 1: measuring motion - doralacademy prep** - motion section 1 math skills velocity metal stakes are sometimes placed in glaciers to help measure a glacier's movement. for several days in 1936, alaska's black rapids glacier surged as swiftly as 89 meters per day down the valley. find the glacier's velocity in m/s. remember to include direction. 1. list the given and the unknown values. **skills worksheet directed reading b - blogsdl3ct** - holt science and technology 15 matter in motion section: measuring motion observing motion by using a reference point circle the letter of the best answer for each question. 1. which of the following helps us to see if something is moving? a. a position b. a reference point c. speed d. velocity 2. what is a reference point? something that appears ... **section 1: measuring motion - upper st. clair school ...** - observing motion (by using a reference point!) motion is an object's change in position relative to another object, or reference point. (the object **section 1: measuring motion - weebly** - motion section 1 bellringer everybody knows what motion is, but how do you measure it? • one way is to measure distance, or how far something goes during a motion. • another is to measure time, or how long a motion takes to occur. • a third way is to measure speed, or how fast something is moving. **chapter 5 directed reading worksheet matter in motion** - section 1: measuring motion (p. 108) 4. name something in motion that you can't see moving. accept any reasonable answer. sample answer: i can't see the earth moving, yet i know it moves (revolves) around the sun. observing motion (p. 108) 5. to determine if an object is in motion, compare its position over time to a point of reference **motion chapter 10 - manchester local school district** - section 1 - measuring motion observing motion to actually observe and object in motion, you must observe the object in relation to another object that stays in place. the stationary object is a reference point or reference frame. how do we know that an object is in motion? when the object changes position in comparison to a reference point. **chapter 11 motion section 11.1 distance and displacement** - chapter 11 motion section 11.1 distance and displacement (pages 328-331) this section defines distance and displacement. it presents methods of describing motion and introduces vector addition and subtraction. reading strategy (page 328) predicting write a definition for frame of reference in your own words in the left column of the table. **skills worksheet directed reading a - westerville city schools** - section: friction: a force that opposes motion 1. the force of friction causes a ball to stop rolling. 2. friction 3. the two forces are (1) the force pushing the surfaces together and (2) the roughness of the surfaces. 4. pavement is rougher than ice. 5. the weight of the larger book on the table creates more friction than the smaller book. 6. **describing and measuring motion answer key** - describing and measuring motion answer key use target reading skills what you know 1. a moving object changes position. 2. you can measure how far something moves. 3. some things move faster than others. what you learned 1. you need to compare motion to a reference point. 2. the meter is the si unit for distance. 3. speed can be calculated and ... **holt chapter 11 motion answer key - pdfdocuments2** - holt chapter 11 motion answer key.pdf free download here **skills worksheet directed reading a - hamilton township schools ...** directed reading a section: measuring motion 1. ... holt science and technology 112 matter in motion answer key teacher resource page. assessment chapter test b **section 1 measuring motion - midway middle school science** - section 1 measuring motion key concept motion can be measured and described in many ways. what you will learn • properties used to describe the motion of an object include a reference point, direction, speed, velocity, and acceleration. **chapter 1 matter in motion section 1 measuring motion - interactive textbook 3 matter in motion section 1 name class date measuring motion continued what is speed?** speed is the rate at which an object moves. it is the distance traveled divided by the time taken to travel that distance. most of the time, objects do not travel at a constant speed. for example, when running a race, you **assessment study guide quiz: chapter 11 - mrs. edwards** - study guide quiz: chapter 11 section: measuring motion in the space provided, write the letter of the term or phrase that best completes each statement or best answers each question. ____ 1. an object that changes position relative to a reference point is a. stationary. c. moving at constant speed. b. in motion. d. moving at constant velocity.
