# Secure Electronic Voting Concepts Implementation

**a security analysis of the secure electronic registration ...** - this report is a review and critique of computer and communication security issues in the serve voting system (secure electronic registration and voting experiment), an internet-based voting system being built by accenture and its subcontractors for the u.s. department of defense's fvap (federal voting assistance program). **secure electronic voting: a challenge ahead** - secure electronic voting: a challenge ahead executive insight series by jonathan g. gossels introduction in response to the vote counting problems in the 2000 presidential election, the help america vote act (hava) was passed on october 2002. with funds available from that bill, approximately 675 counties have purchased touch screen voting systems **design a secure electronic voting system using ...** - electronic usage during the course of an election. a. electronic voting: electronic voting refers to any system where a voter casts his or her ballot using an electronic system, rather than a paper. once recorded, an electronic vote is stored digitally and transferred from each electronic voting machine to a counting system [16]. **secure electronic voting protocols - ut** - secure electronic voting protocols helger lipmaa, cybernetica as and university of tartu (estonia) contents 1 introduction 1 2 voting: general overview 2 3 e-voting: general setting 3 4 cryptographic preliminaries 5 5 homomorphic e-voting schemes 8 6 verifiable shuffle-based e-voting schemes 9 7 comparison and practical consideration 10 **scytl secure electronic voting** - scytl secure electronic voting mathematics in the elections: beyond the simple counting of votes november 2011 jordi puiggali vp r&d jordi.puiggali@scytl **6.857 computer and network security october 29, 2002 ...** - it gives the homomorphic property we want for voting. it is semantically secure, assuming that it is hard to distinguish  $n$ th residues from non- $n$ th residues mod  $n^2$  (in addition to the dlp). semantically secure means that you cannot distinguish  $e(0)$  from  $e(1)$  better than 50% as  $n \rightarrow \infty$ . 6 voting with paillier cryptosystem and blind signatures **secure electronic voting protocol on bilinear pairings200...** - sound electronic voting protocol based on sensus protocol from bilinear pairings, which can really satisfy the security requirements of an e-voting system. keywords: electronic voting, bilinear pairings, id-based cryptographic system 1. introduction for traditional voting has some problems such as its inconvenience and high **functional requirements for a secure electronic voting system** - the paper absentee ballot process [5], deriving requirements for electronic voting systems based solely to this procedure. although such approaches may produce secure and/or legitimate electronic voting systems, they have not led to the specification of a complete system. thus, the focus of our work is to express the: (a) legal, (b) **proposal for secure electronic voting - the economist** - proposal for secure electronic voting willem wyndham, spencer chen, saurav das university of maryland, college park september 29, 2016 1 **secure electronic voting over the world wide web** - secure electronic voting over the world wide web by mark a. herschberg submitted to the department of electrical engineering and computer science on may 27, 1997 in partial fulfillment of the requirements for the degree of bachelor of science in computer [electrical] science and engineering **voting system security and reliability risks** - or vote on an electronic machine that produces a paper trail. despite these advances, there is still more work to do to ensure that all voting machines are as secure and reliable as possible. outdated voting machines pose serious reliability and security risks • in november, 42 states will use voting machines that are at least 10 years old.
